COPYRIGHT / TRADEMARK NOTICE

All copy or material sent to us for use in production of an order, will be accepted as being in compliance with all applicable laws regarding trademark, copyright, right of privacy, patent or similar protection. The customer, by submitting such copy, represents that our use on the items ordered will not violate any such laws, and as such, we hereby disclaim any liability for compliance with such laws in the use of the customer's copy or material. The customer hereby agrees to hold us harmless to any damages arising as a consequence of use of said design or copy.

CALIFORNIA PROPOSITION 65

All our products meet applicable federal safety and warning requirements as enforced by the U.S. Food and Drug Administration and the Consumer Product Safety Commission.

California Proposition 65, otherwise known as the Safe Drinking Water and Toxic Enforcement Act of 1986, states that products shipped to CA must display product warnings informing users of chemicals known to the state of CA to include carcinogens or reproductive toxins unless such chemicals are not present or are present below established Safe Harbor Levels.

Every component on every product we sell is tested, so as to comply to every standard applicable. The key chemicals we target for Prop 65 compliance are lead, mercury, cadmium, BPA and phthalates (10 total). Every new product must pass all tests before it is released into production; and then made available for sale. In addition, any existing products that are sourced from new suppliers are treated like new products. We re-test periodically, usually between 2-4 years, depending upon risk, sales volume and similar considerations. We require verification of testing from our domestic suppliers and also test all our imprinting inks, foils, transfers and epoxy used in our doming process. None of our imprint inks or processes require a Prop 65 warning.

We will either reformulate or try and secure alternative sources for any product that has not met the criteria for Prop 65's list of 900+ chemicals. Items affected by Prop 65 are identified on our website and in our catalog, and when these items are shipped into the state of California, will receive the short form warning shown below.

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

PLACING AN ORDER

All orders are accepted subject to our standard delivery and credit terms. If we are unable to meet a required delivery date, you will be contacted by a Customer Service Representative. The electronic

sending of an order does not guaranty the ability to meet an in-hands date.

PRODUCTION - RUSH ORDERS

Normal production is subject to inventory availability and imprint method utilized. Screen printed orders and laser engraved orders ship in approximately 5 working days; production times for full-color imprinting is detailed within the product descriptions. All times are after proof approval and credit acceptance. Rush delivery dates must be accepted by Bankers® and rush charges may apply. Always check stock availability and production on critical in-hands orders.

PRICING • TARIFFS • QUOTATIONS

Prices are subject to change upon 30 days notice. We have tried to provide the most up-to-date pricing in this catalog taking into account all known variables. Since we cannot predict future tariffs, and to the extent that any tariff imposition materially impacts our cost structure, we would recommend your checking our website for the most current pricing and any ongoing specials. Unless otherwise noted, written quotations are valid for 45 days. All pricing is FOB New Jersey. Verbal offers are not binding until they are confirmed in writing by our office. Quoted freight charges are estimates only.

CHANGES & CANCELLATIONS

We will not accept changes or cancellations to an order, unless made in writing and acknowledged by one of our Customer Service Representatives. Canceled orders will be subject to charges for work completed prior to cancellation.

GUARANTEE

We unconditionally guarantee our products against manufacturer's mechanical defects.

TERMS

Receipt of order by us does not constitute order acceptance. With the extension of credit, our terms are 1%/10 net 30. We accept VISA, Mastercard, American Express and Discover. All payments must be in US funds. Any special pricing arrangements will only be valid if payment is made within our agreed terms. Invoices paid with a credit card after 30 days are subject to a 3% processing fee. Credit card information authorized for future use will be entered into our PCI compliant system and only the last four digits of the card will be viewable to authorized Bankers® personnel.

RETURN AND REPLACEMENTS

No returns for repair, credit or replacement will be accepted without prior authorization. Authorized returns must be made within 30 days from the time order was received. Any returned merchandise must

be packed securely to avoid damage in transit. Any credit issued will be for actual quantity of product returned.

ARTWORK • PRINTING

Multicolor artwork should be clearly marked and any PMS colors referenced. Depending on the printing process utilized, we will do our best to match the requested colors.

Any art submitted should be in Adobe Illustrator® format with any text converted to outlines. Copy will be arranged according to instructions provided, or in our art department's best judgement, if no instructions are provided.

A change of ink charge of \$15(g) applies when an imprint color is changed on any portion of an order. A change of copy charge of \$15(g) applies to each additional ad copy in a given order. If any ad copy falls below the specified product minimum shown in the catalog, then an under minimum charge of \$20(g) instead of the change of copy charge will apply. Absolute minimums are usually half the catalog published minimum unless the published minimum is 25 pieces or less. In such cases, the absolute minimum is the published quantity.

PROOFS

If there are any concerns with respect to a layout, we suggest a paper or virtual proof be done \$10(g). The cost for a screen printed or laser engraved product proof is \$25(g) plus freight. The cost for any full-color product proof is \$50(g) plus freight. We do not provide pre-production proofs on any of our full-color digital wraps.

CLIP PRINTING

We have the ability to screen print or pad print the clip of certain pens. For this option, there would be both a set-up charge of \$30(e) in addition to a running charge of \$.15(g). Minimums apply.

LASER ENGRAVING

Laser engraving is the process whereby an imprint is permanently etched into the finish of a product. The standard laser imprint area varies by product and is Unless otherwise directed, we will lay out the imprint to make the most effective use of the available image area. On laser engraved orders, each item indicates how many lines of text are included. For a list of updated typefaces please visit our website. Available laser typefaces are shown on page 83. On those metal pens on which we offer our laser rotation process, additional lines of straight line copy is available for \$.05(g).

For a laser engraved logo, there is both a set-up charge of \$20(g) in addition to a laser logo running charge of \$.20(g). Some pens are available with Laser Rotation (this process carries an additional cost – see page 83). Oxidation is the process whereby a laser engraved image is chemically darkened to provide greater contrast for the image. This is normally done on chrome pens. When not already shown as included in the selling price, the additional cost for oxidation is \$.40(g).

Laser personalization – is available for \$.65(g) per engraved name.

SHIPPING

Unless directed otherwise, our standard ship method is UPS or FedEx Ground, at our discretion. We cannot guarantee transit time once a shipment leaves our factory. Insurance is added to freight charges and is included in total transportation charges when billed. Orders that do not request a specific shipping method will be shipped via the most economical method to meet any in-hands date.

Shipments of an order after the initial release will incur a split shipment charge of \$10(g). Orders shipped to multiple destinations will incur a drop shipment charge of \$10(g) for each additional destination. We do not charge anything additional for shipping 3rd party.

REFILL • REFILL SUBSTITUTIONS

All our pens come standard with a deluxe black ink refill. Some pens offer a choice of either black or blue ink, while others pens will incur an added cost for blue ink refills. On some pens substitutions are not offered at all. Black ink will be provided if no refill color is specified.

EXTRA REFILLS

Not all refills are identical; and we do not offer replacement refills on all products. Prices vary by refill type. On most products, refills are available in black or blue ink.

Standard Plastic Refill - \$.13(g)
Cross®-Type Metal Refill - \$.30(g)
Jumbo Parker®-Type Plastic Refill - \$.30(g)

Laser Engraving

Inkredible offers laser engraving on all of its metal pens and metal products. Laser engraving is the process whereby an imprint is permanently etched into the finish of the product.

There are many advantages to laser engraving over other conventional printing methods, the most important being the permanence and crispness of the finished imprint. A laser engraved imprint will forever be delivering its intended message.

All of our metal pens are offered with 3 lines of copy laser engraved in one of our standard laser fonts (see the list below for the list of our standard fonts). For a laser engraved logo (laser engraved within the standard imprint area), there is both a \$20(g) set-up charge as well as a \$.20(g) running charge.

In the past, the greatest limiting factor with laser engraving, was the height of the image being laser engraved. Inkredible, with its exclusive Laser Rotation Process, has developed a method enabling us the ability to exceed the normal limits for laser engraving. Need more than 3 lines of copy? No problem! For \$.05(g) per line, you can add as many additional lines as you require. Have a logo that is very detailed and would present better in a larger imprint area, no problem! Most logos can utilize our Laser Rotation Process, and the resulting image size can be increased significantly. The added cost for Laser Rotation is approximately \$.20(g) per piece in addition to the regular laser charges. Contact factory with your requirements and let us show you what we can do to enhance your laser engraved logo. Please note, this process is only currently available on metal pens as noted. It is not currently available on other laser engraved products (but we are working on this!). Also, these costs are per piece, and on pen and pencil sets, these prices are per pen and per pencil.

Engraving without rotation.

Same logo engraved with rotation.

Our standard typefaces are:

<i>Brushed Script</i> *	<i>Monotype Corsiva</i> *
Comic Sans	<i>Standard Script</i> *
<i>Edwardian Script</i> *	Times Roman
Helvetica	<i>Times Roman Oblique</i>
<i>Helvetica Oblique</i>	Times Roman Expanded
Helvetica Expanded	Times Roman Condensed
Helvetica Condensed	
Jester *	
<i>Lucidia Calligraphy</i> *	

*Because of the height of some of its characters, imprints using fonts listed above marked with an asterisk can only have two lines of copy not three, or can be used as part of our Laser-Rotation process.
